- Install

We're your Wellington region specialists in shutters, blinds and screens, with years of experience to help you select from a wide range of quality window treatments, that are custom manufactured and installed to your specifications, for the best fit and finish.

## Blinds

*Custom manufactured blinds for every space*

Our modern blinds come in a variety of styles with a selection of lifting systems and devices. Choice of sun filtering, light filtering, blocking and insulating fabrics, with a wide range of colours and textures to suit your look and functionality requirements at competitive prices.

### Roller

*Popular, non-intrusive blinds*

Roller blinds complement the style of any home, apartment or office. They're non-intrusive, rolling away at the top of the frame to make rooms feel spacious and preserve your view. Options for full privacy, partial privacy, block out and various degrees of light filtering. Control systems from standard chain through to full motorisation. Custom-made roller blinds are easy to clean, durable and can be manufactured to 3000mm wide.

### Thermacell

*Warm up your home*

An insulating blind with a honeycomb construction, traps a layer of air reducing the transfer of heat and creating a barrier between the exterior and interior of your home to provide superior energy efficiency and reduce heating costs. Blinds fit tightly into the window or door jamb to enhance their insulating and darkening properties with minimal visual impact on your window when lifted. A wide range of colours, fabrics and operating systems.

### Venetian

*A classic in wood or aluminium*

Quality venetians crafted from hardwood, fauxwood or aluminium in a range of colours are a timeless, easy to operate style for effective control of light, privacy and airflow. Filter harsh UV, as the slats tilt and lift. Ecowood venetian blinds with PVC slats or aluminium venetian blinds are ideal for areas requiring a moisture resistant blind, as they won't warp or rot when exposed to prolonged moisture. They won't block your view and are great for small or large windows, or door openings.

### PerfectSheer™

*Horizontal fabric vanes for light control*

This blind diffuses or redirects light from outside, with sheer fabric facings and gently curved, horizontal vanes. Double layered fabric of either light filtering or room darkening fabrics, combined with an alternating sheer panel that is woven into the fabric. Operated by a continuous cord to lower and raise the blind, as well as positioning the vanes. Finished with a compact headrail. Range of colours and suitable for both inside and outside frame mounting.

SHUTTERS  
& BLINDS**

## Contemporary Shutters

Add effortless style with interior shutters

Our shutters are manufactured to fit perfectly and create lasting elegance in any room. Shutters are low maintenance with simple to adjust louvres with folding, fixed or sliding options, making them ideal for windows, doorways or as room dividers. Choose from woods, composites and aluminium with blade and tiltbar options.

## Outdoor

Create private, wind free & low maintenance outdoor spaces with exterior aluminium shutters & screens

Easy-care, powder coated aluminium shutters and screens are designed to be hard wearing for exterior use. Create cost effective outdoor living areas or building screens where privacy, security or protection from wind and sun are required.

### Business, Commercial & Residential Project Work

We work closely with group builders and businesses to provide all options from our wide range of blinds, shutters and screens for residential and commercial projects of any size.

*Call us to discuss your project.*

### Blinds Starter Package

*Designing a new home or renovating?*

Get a head start on window treatments with our 'Blinds Starter Package'. We'll help you select the best blinds for your home and quote off plans, so that you will have blinds installed for essential privacy and light control, ready for you to move in.

## Curtain Styles

### Panel Curtains

Vertical fabric panel curtains for the minimalist

Chic fabric panels with a unique clip construction system ensures that the soft panels have no visible stitching and that there is no gap between panels when closed. They easily slide to the side and stack tidily behind each other in the open position. Their minimalist look, flexible stacking positions and 'Child Safe' wand operation make them ideal for larger windows, doorways or as a room divider, without the need for bottom tracks. Range of fabrics, colours, textures and designs.

### Louvre Curtains

Versatility with vertical fabric louvres

A practical window treatment with vertical fabric louvres that rotate up to 180 degrees. Louvre blinds give you access to doors, as they stack back fully or partially, and are especially suited to large windows and sliding doors. Each louvre is finished with bottom weights and the blind is easily operated using a PVC 'Child Safe' wand, making these an ideal option where child and pet safety is a requirement. Variety of track colours and an extensive range of fabrics to match your décor.

### SmartDrape™

Walkthrough, dual purpose vertical fabric vanes with sheers

A unique, unimpeded construction allows you to walk through, even when the shade is closed. SmartDrape is a series of individual fabric vanes, suspended in sheer fabric to create a floating effect. Close the blind and it becomes completely solid or open the louvres and transition to a sheer effect, and all the options in between. Has the appearance of a curtain without the bulk, but with the easy control of a blind. Provides excellent value over purchasing solid and sheer curtains separately.
